

ECOMMERCE SHOPPING CART PLUGINS

PayGate Magento plugin v1.0.8 for Magento v 1.9.4.x

Thank you for downloading the PayGate plugin for Magento.
Along with this integration guide, your download should also have included your plugin in a .zip (or compressed) format. In order to install it, kindly follow the steps and instructions outlined below, and feel free to contact the PayGate support team at support@paygate.co.za should you require any assistance.

INSTALLATION INSTRUCTIONS

STEP 1

Extract the contents of the downloaded .zip file to your preferred location on your computer. That can be done using unzipping applications such as WinZip and many others, but for a complete list of suitable applications and programs, simply search the Internet for "unzipping application". This process should create a number of files and folders at the location you chose to extract them to.

STEP 2

Copy the 'app' folder into the Magento install e.g. **magentorootfolder/app**.

Navigate to **System > Cache Management** to clear the cache and the PayGate module should be visible on **System > Configuration > Payment Methods**.

STEP 3

Login to your Magento admin area and navigate to the **System > Configuration page**. Once there, click the **Payment Methods** link under the **Sales tab** where you'll notice PayGate is available. In order to configure your plugin, simply expand the PayGate settings, enter your preferred data into each field and click the Save Config button found to the top-right of screen.

PAYGATE WILL NOW BE AVAILABLE AS A PAYMENT
METHOD ON THE CHECKOUT PAGE.
